

QGIS Application - Bug report #639

New layer points disappear

2007-03-06 11:34 AM - zak0485-aol-com -

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Vectors	
Affected QGIS version:	Regression?: No
Operating System: Debian	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 10698

Description

When I make a new layer shapefile in Qgis it makes the first point on the map but does not make any further points. They show up in my attribute box but do not show up on the map. I am running it on Windows XP.

History

#1 - 2007-06-11 06:06 PM - Tim Sutton

- Resolution set to fixed

- Status changed from Open to Closed

I tested with 0.8.1rc3 and it works for me. Please reopen if the problem returns.

#2 - 2009-08-22 12:51 AM - Anonymous

Milestone Version 0.8.1 deleted
