<b>Easy fix?:</b>	No	
<b>Description</b>		
<p>when plot from a layerwms using the tile method. The actual qgis-dev version don't show anything.</p> <p>So the user must wait without any feedback that it is really downloading anything.</p> <p>If the plot is large format (ie A0) the time wait is many minutes and so a counter of downloaded tiles and of bytes download will a good information that nothing is locked.</p> <p>I remeber an old version of qgis-developer do this.</p>
