Crashes QGIS or corrupts data:		**Copied to github as #:**	15673

Description

Hi,

I try to set on a simple new svg 8from inkskape) the two params:

fill="param(fill) #.."
and
stroke="param(outline) #.."

I see the fill color is correctly applied but also to the outline.

And when try to set the outline color.
It apply always black to all symbol (outline and fill).

I attache the sample SVG symbol.

I'm using qgis-dev 126B897 on windows 7 (64 bit).

History

#1 - 2015-10-09 09:30 PM - Nyall Dawson

- Resolution set to worksforme

- Status changed from Open to Closed

Works OK in current master.
