

QGIS Application - Bug report #6479

QGIS WFS-T doesn't send feature ids for delete operation

2012-10-07 09:39 PM - Chris Smith

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Web Services clients/WFS	
Affected QGIS version:	master	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 15707
Description		
<p>In QGIS master (and 1.8.0), if I delete some features on a layer which supports WFS-T, QGIS fails to populate the request properly. The feature ids of the features to delete are left out. EG, i deleted two features and QGIS sent:</p> <p>...</p> <pre><Delete xmlns="http://www.opengis.net/wfs" typeName="sps:Boundary"><Filter xmlns="http://www.opengis.net/ogc"/></Delete></pre> <p>...</p>

- Status changed from Open to Closed

This turned out to be the server not sending the feature ids of the original features (so QGIS doesn't know what to send back).
