

QGIS Application - Feature request #648

Create route from waypoints in GPX Layer

2007-03-11 06:36 AM - cbsled-verizon-net -

Status: Closed	
Priority: Low	
Assignee: Magnus Homann	
Category: Digitising	
Pull Request or Patch supplied:	Resolution: fixed
Easy fix?: No	Copied to github as #: 10707
Description	
Add functions to:	
*Create Route from Waypoints	
Create Waypoints from Route*	
in a GPX layer. Then the route and waypoints will exactly match, and only one digitization pass will be required.	
An enhanced function would be to add an option to:	
Snap to Waypoints	
when digitizing a route which does not follow the waypoints in the order in which they were entered.	

History

#1 - 2007-12-11 11:21 AM - Magnus Homann

- Status changed from Open to In Progress

#2 - 2007-12-13 08:10 AM - Magnus Homann

- Resolution set to fixed

- Status changed from In Progress to Closed

In commit:4ae3e208 (SVN r7778) a tab is added to the GPS plugin that simplifies conversions of GPX files. Requires gpsbabel installed.
