QGIS Application - Bug report #6492
Save-as to csv fails

2012-10-10 05:46 PM - Alister Hood

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:				
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	worksforme	
Crashes QGIS or corrupts data:		**Copied to github as #:**	15714	

Description

This is the error message:

    Export to vector file failed.
    Error: creation of data source failed (OGR error:)

So far I have tested in Windows, saving from memory layers or shapefile layers. The shapefile layers can be successfully translated using ogr2ogr in a terminal.

I have seen a number of previous reports about this problem, but can't see any tickets about it.

Is this still open?

#2 - 2014-04-08 09:11 PM - Alister Hood

- Resolution set to worksforme

- Status changed from Open to Closed

Good spotting. I don't think so, although I don't have access to Windows to test there...
