

## QGIS Application - Bug report #6524

### eVis Plug-In, eVis-Database-connection to a MS-Access data base (QGIS 1.8)

2012-10-16 06:38 AM - Michael Rembe

<b>Status:</b> Closed	
<b>Priority:</b> High	
<b>Assignee:</b>	
<b>Category:</b> C++ Plugins	
<b>Affected QGIS version:</b> 1.8.0	<b>Regression?:</b> No
<b>Operating System:</b> Windows	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b> No	<b>Resolution:</b> fixed/implemented
<b>Crashes QGIS or corrupts data:</b> Yes	<b>Copied to github as #:</b> 15740

#### Description

The result of the sql-statement on an Access-db is stored into a temporary file (f.e.

<datasource>file:///C:/Users/MICHAEL~1.WTN/AppData/Local/Temp/qt\_temp.IE1500?delimiter=%09&delimiterType=regex&xField=Eastings&yField=Northings</datasource>). Because the file was deleted by QGIS QGIS crashes after re-opening the file.

#### History

##### #1 - 2012-12-30 09:46 AM - Giovanni Manghi

- Priority changed from Normal to High

##### #2 - 2013-07-12 10:43 AM - Paolo Cavallini

- Category set to C++ Plugins

##### #3 - 2014-02-08 02:42 PM - Jürgen Fischer

- Status changed from Open to Feedback

Is this still the case? QGIS doesn't crash if a delimited text file is removed while qgis is running nor when a project that references a non-existent file.

##### #4 - 2014-02-15 04:25 AM - Giovanni Manghi

- Resolution set to fixed/implemented

- Status changed from Feedback to Closed

closing for lack of feedback (and because it is most likely fixed).
