QGIS Application - Bug report #6524
eVis Plug-In, eVis-Database-connection to a MS-Access data base (QGIS 1.8)

2012-10-16 06:38 AM - Michael Rembe

Status:	Closed			
Priority:	High			
Assignee:				
Category:	C++ Plugins			
Affected QGIS version:	1.8.0	**Regression?:**	No	
Operating System:	Windows	**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	15740	

Description

The result of the sql-statement on an Access-db is stored into a temporary file (f.e.
<datasource>file:///C:/Users/MICHAE~1.WTN/AppData/Local/Temp/qt_temp.IE1500?delimiter=%09&delimiterType=regexp&xField=Easting&yFi
ting&yField=Northing</datasource>). Because the file was deleted by QGIS QGIS crashes after re-opening the file.

History

#1 - 2012-12-30 09:46 AM - Giovanni Manghi

- Priority changed from Normal to High

#2 - 2013-07-12 10:43 AM - Paolo Cavallini

- Category set to C++ Plugins

#3 - 2014-02-08 02:42 PM - Jürgen Fischer

- Status changed from Open to Feedback

Is this still the case?   QGIS doesn't crash if a delimited text file is removed while qgis is running nor when a project that references a non-existent file.

#4 - 2014-02-15 04:25 AM - Giovanni Manghi

- Resolution set to fixed/implemented

- Status changed from Feedback to Closed

closing for lack of feedback (and because it is most likely fixed).
