Pull Request or Patch supplied:	No	Resolution:
Easy fix?:	No	Copied to github as #: 15779
Description		
<p>Using Raster Calculator, I changed the bounding box coordinates so that it would only do a small subset of the data. I expected it to automatically change the "columns" and "rows" parameters, but it didn't. I left it on the defaults and ended up with a 5GB file when the input extent was only about 1MB worth of data.</p> <p>I consider this a bug because how is the user supposed to know the value for Columns/Rows when using a subset but appreciate its probably a "feature request"? In these cirumstances it should automatically recalculate.</p>
