

QGIS Application - Bug report #6611  
converting OSM file to shp losses data in the procees

2012-11-02 01:26 PM - baditaflorin -

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Project Loading/Saving	
<b>Affected QGIS version:</b>	1.8.0	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> invalid
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 15799
<b>Description</b>		
<p>I have a OSM file for Romania, created using osmconvert from pbf.</p> <p>and i load the osm data into Qgis using Openstreetmap plugin</p> <p>i do right click on the points layer, save as ersi shapefile</p> <p>After i load the data a lot of data gets lost in the process.</p> <p>You can see from the attached files that in second example, the tag attribute misses a lot of data, making it useless for statistics.</p> <p>And i cannot use the osm file because with 60000 objects inside, it's moving to slow.</p> <p>The SHP file haves great speed, but it has this bug too.</p>

please attach sample data.

#2 - 2012-12-29 05:51 AM - Giovanni Manghi

- Resolution set to invalid

- Status changed from Feedback to Closed

shapefile have a 255 char limit for columns width, so not a qgis bug, but a format limitation. If you need to preserve all the data then you will need to export in a more advanced format, like spatialite or postgis.
