Description

In most plugins there is no separate licence file, and in many there is no licence whatsoever.

I think this should be a requirement for accepting a plugin on the repo, and should ask authors to fix this.

IMHO we should establish a standard way to add it (e.g. provide a LICENSE file and put license header to all sources, probably integrating in Plugin Builder).

Unsure whether this is the right place to place this ticket - feel free to move it elsewhere.
