

QGIS Application - Bug report #662

mapserver export incorrect for OGR layers

2007-03-15 09:22 AM - anonymous -

Status: Closed	
Priority: Low	
Assignee: Gary Sherman	
Category:	
Affected QGIS version:	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 10721

Description

I am running qGIS with [[MapInfo]] tab files, mainly using it to export map files for my mapserver 4.10.1

In the export there are some errors:

- The tabfiles are handled like ESRI shape files, with the parameter DATA set to the path of the file, this is incorrect. It should use CONNECTION and CONNECTION TYPE OGR instead

History

is this still valid with new python plugin?

If not, please close it.

#2 - 2008-04-01 12:31 AM - leolami -

- Resolution set to fixed

- Status changed from Open to Closed
