QGIS Application - Bug report #6695
Contour extraction doe not consider chosen format

2012-11-14 11:13 PM - Denis Rouzaud

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	GDAL Tools			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	15860	

Description

In the contour extraction dialog, the chosen format is not taken into account.
It always create shapes!

The *-f format* option is not specified in the command.

-f format:

create output in a particular format, default is shapefiles.

- Target version changed from Future Release - Lower Priority to Future Release - Nice to have

Just to clarify: The file open dialogue allows different file formats (like DXF), but that just adds the suffix to the target filename. As a result, you get a folder with extension .dxf (or else), containing the shapefile files.

I would expect that the file open dialogue also adds the **-f format** part to the gdal_contour commandline. It has to be edited manually by clicking on the pencil.

BTW the Processing Toolbox module GDAL/OGR Contour has the same bug.
