

QGIS Application - Bug report #6697

Missing "not" operator

2012-11-15 07:41 AM - Jonathan Moules

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	GUI	
Affected QGIS version:	1.8.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 15862
Description		
In the raster calculator, there is no "Not" operator to click on. This is a problem because its not clear which of the many "not" operators the calculator uses (https://en.wikipedia.org/wiki/!=#Standard_relational_operators) After some testing, it appears to be !=

Hello, bug triage...

as you said, "NOT" operator is "!=". It seems to be coherent with other operators naming on the raster calculator: there is no "IS" operator for equality test, just "=" sign instead.

I think we can close this bug...
