

## QGIS Application - Bug report #6699

### refresh button does not work as expected in browser in qgis master

2012-11-15 11:20 AM - Giovanni Manghi

<b>Status:</b> Closed	
<b>Priority:</b> Severe/Regression	
<b>Assignee:</b>	
<b>Category:</b> Browser	
<b>Affected QGIS version:</b> master	<b>Regression?:</b> No

<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> fixed
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 15864
<b>Description</b>	
<p>I believe this is a regression, because I don't see this issues in qgis 1.8</p> <p>There are cases where the refresh button has no effect:</p> <p>I just tried to drag and drop a shape from a system folder into a postgis connection, for some reason the process returned and error. After that the postgis connection is no more available, as the connection name is shown, but it does not show any of the schemas in it. Hitting refresh has no effect, the only way out is restart qgis.</p> <p>This also happens when deleting a layer from a postgis schema, in 1.8 you can then hit "refresh" and have the list updated, in master it just does not show anymore any layer in any schema. And hitting refresh does not work.</p> <p>I believe I have seen this issue with other operations, but right now are the ones I remember.</p>

## History

### #1 - 2012-11-15 11:23 AM - Giovanni Manghi

Just found another case:

if I have an empty postgis schema, this does not show in browser (another bug?).

if I import a vector in it, in qgis 1.8 I can then hit refresh and see the schema and vector, in master it does not work.

### #2 - 2013-05-18 02:55 AM - Giovanni Manghi

- Resolution set to fixed

- Status changed from Open to Closed

the original issue described here is gone, but unfortunately I found many more I will describe in separate tickets.
