QGIS Application - Bug report #6703
Vector transparency is not reported consistently

2012-11-15 06:45 PM - Alister Hood

Status:	Closed		
Priority:	Low		
Assignee:			
Category:	GUI		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	15868

Description

- Style a vector layer using the rule based renderer

- Right-click on a rule, click "Change transparency", and set it to 20%

- Right-click on the rule and click "Change transparency" again. It will still say 20%.

- Double-click on the rule. The "rule properties" dialog will say the transparency is 19%!

- Adjust the slider so that it says the transparency is 19%. Close the dialog.

- Right-click on the rule and click "Change transparency" again. It will (probably) say 19%.

I have no idea if this is something that can be "fixed", and I don't believe there is any practical difference between 19% and 20% transparency, but it would be nice if the numbers reported in the two dialogs were consistent.

History

#1 - 2012-11-16 12:38 AM - Alister Hood

Also tested in 1.8

#2 - 2015-11-11 03:37 AM - Médéric RIBREUX

- Resolution set to fixed/implemented

- Status changed from Open to Closed

Hello, bug triage...

I can't reproduce it on QGIS 2.12 and master. Transparency value is always as previously set.

I am closing this bug...
