QGIS Application - Bug report #672
postgis query-builder-dialog reenter failed after reload project

2007-03-20 07:06 AM - tux-jd67-de -

Status:	Closed			
Priority:	Low			
Assignee:	nobody -			
Category:	Project Loading/Saving			
Affected QGIS version:			**Regression?:**	No
Operating System:	Debian		**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	fixed
Crashes QGIS or corrupts data:			**Copied to github as #:**	10731

Description

If I setup a query to a postgis-layer, save the project an load the project again, and try to alter the query of the layer I got the error
"sendauth: no password supplied"!
If I setup a postgis layer without a query, save project, load project, the query-builder works fine
 until I put something in the querybox and save.
Looks like a writing/parsing problem with the xml-project file!?

Jan.

Works for me with head. Do you still have this problem?

#2 - 2008-03-07 10:54 PM - Paolo Cavallini

This seems related to https://trac.osgeo.org/qgis/ticket/586
The bug seems solved in 0.9.2. If it is not confirmed, please close it.

- *Resolution set to fixed*
- *Status changed from Open to Closed*

I close it. If you think it is still valid reopen it, please.
