QGIS Application - Bug report #6725
state of toggle editing button changes even when you click cancel

2012-11-18 03:55 PM - Alister Hood

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	GUI			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	15889	

Description

- edit a vector layer
- click the "toggle editing" button in the main window to toggle editing off
- click "cancel"; the state of the "toggle editing" button will still indicate that editing is on (as expected)
- open the layer's attribute table
- click the "toggle editing mode" button (note the different name in the tooltip) in the attribute table
- click "cancel"; the state of the button will change to indicate that editing is off! (but the state of the button in the main window will not change).

Also occurs in 1.8
