Hi, I already solve the problem. I have to uninstall the Sextante and then install again. After that works good.

Regards,

José Santos

#2 - 2012-11-22 02:51 AM - Alexander Bruy

- Resolution set to fixed
- Status changed from Open to Closed

Ok, then I close this ticket.

BTW, please open SEXTANTE-related tickets in [SEXTANTE bugtracker](#), not in QGIS one

Ok thanks for the information.

I just post here because was the Sextante Plugin to QGIS and probably more people will have the same problem if they update from 1.0.7 to 1.0.8.

Best Regards,

Jose Santos
