

QGIS Application - Bug report #675

System Crash when opening .shp file.

2007-03-20 03:53 PM - gmr-v-yahoo-com -

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Data Provider	
Affected QGIS version:	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 10734

Description

Hello,

I recently started using your gis program, but it started repeatedly crashing on me last week when I try to open .shp files.

I tried uninstalling and reinstalling it, but to no avail.

Any suggestions?

Thank you,

Ag

P.S. The error notificaiton says it writes it to a log, but the log is not there when I search for it.

Try the latest preview release to see if the problems go away:

<http://blog.qgis.org/?q=node/56>

Make sure you uninstall the old version

#2 - 2008-02-12 07:30 AM - Paolo Cavallini

- Resolution set to fixed

- Status changed from Open to Closed

Useless bug: without a sample failing shp, this cannot be replicated.
