

QGIS Application - Bug report #6791

crash adding features to OGR layers if any attribute index is missing in the layer

2012-11-29 10:27 AM - Giuseppe Sucameli

Status:	Closed	
Priority:	Normal	
Assignee:	Giuseppe Sucameli	
Category:	Data Provider	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 15939
Description		
<p>Here's the snippet to reproduce it.</p> <pre>feat = QgsFeature() feat.setAttributeMap({"pk" : "1000000"}) layer = self.iface.activeLayer() layer.startEditing() layer.addFeature(feat) layer.commitChanges()</pre> <p>Ok, the crash depends on the wrong attribute map key which is a string instead of the integer index of the field, I know. But this cause bindings convert the string to -1 which is passed as attribute index to the OGR library...</p>
