Description		
<p>Add an aggregate stats to the plugin manager's view that shows number of downloads per country per month. For companies like mine to have such tool is indispensable to understand which country to target for marketing and business development.</p> <p>Therefore this feature would be greatly appreciated.</p> <p>Thank you</p> <p>Regards,</p> <p>Matteo</p>

If I look at the database, there is no fields to correlate between the plugin, and the number of download per country. This is good though, we can show a heatmap of the number of downloads for all countries.
