

QGIS Application - Bug report #682

HTML in python console not escaped

2007-03-23 10:17 AM - barry-rowlingson-gmail-com -

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Python plugins	
Affected QGIS version:	Regression?: No
Operating System: Linux	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 10741

Description

Text from the python console is interpreted as HTML, so when python prints something in angle brackets (eg <+main+.Foo instance at 0xb7d0c40c>) you see nothing.

I used to get round this by printing to stdout and seeing it on the calling console, but now print in python goes to the python console :)

Not sure if its possible to html-escape output to the console, or just turn the console into a plain text window.

History

#1 - 2007-03-25 04:58 AM - Martin Dobias

- Resolution set to fixed

- Status changed from Open to Closed

Fixed in commit:ef92d638 (SVN r6830) by Gary.
