Assignee:		
Category:		
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 15976
Description		
Field names displayed on attribute table are not updated when encoding is changed.		

Associated revisions

Revision ab553250 - 2013-03-27 01:34 AM - Minoru Akagi

refresh field names after all layers loaded and encoding change (fix #6840)

History

#1 - 2012-12-13 06:45 PM - Minoru Akagi

- File hello.csv added

The attached csv file contains language names and "Hello" in English, Russian, Chinese, Korean and Japanese. The file encoding is UTF-8. To confirm this issue, load the file with other encoding than UTF-8 selected. Then change layer encoding into UTF-8. Garbled field names are still there.

#2 - 2013-01-10 01:11 PM - Minoru Akagi

- Status changed from Open to Closed

Fixed in changeset commit:"834107a68af240c486dd467a9dceac812d4beba2".

#3 - 2013-02-26 12:18 AM - Minoru Akagi

- Status changed from Closed to Reopened

The fix became disabled by the recent API change. I need fix again.

#4 - 2013-03-31 10:04 PM - Anonymous

- Status changed from Reopened to Closed

Fixed in changeset commit:"ab55325083e1c8944b8c0808d5c9b4599634ba4c".
