

QGIS Application - Feature request #6844

Forwarding of finished() to detect external process termination

2012-12-09 01:53 AM - Rafael Varela

Status: Open	
Priority: Normal	
Assignee:	
Category: C++ Plugins	
Pull Request or Patch Supplied:	Resolution:
Easy fix?: No	Copied to github as #: 15980
Description	
<p>I think that it would be useful if QgsRunProcess::processExit() [1] forwards the finished() signal [2] sent by QProcess, so a plugin that runs an external process could detect when the process exits.</p> <p>I'm assigning this request to "C++ Plugins", but don't forget the Python Bindings.</p> <p>[1] http://www.qgis.org/api/qgsrunprocess_8cpp_source.html</p> <p>[2] http://doc.qt.digia.com/qt/qprocess.html#finished</p>
