QGIS Application - Bug report #6867
Editorlayout is not saved in project file for a non-spatial spatialite table

Crashes QGIS or corrupts data:	No	**Copied to github as #:**	16000

Description

I can connect a custom form to both a spatial and a non-spatial spatialite table.
But only for the spatial table is the attribute editor layout setting (properties-fields tab) stored in the qgis project file.

I think this is a regression since it earlier was possible to connect a custom form to a non-spatial table and also keep information about this connection in the qgis project file.

A sample qgis project, spatialite db and custom form is attached. See project file where <editorlayout>uifilelayout</editorlayout> is only set for the spatial table.

History

#1 - 2013-01-07 08:40 AM - Matthias Kuhn

- Status changed from Open to Resolved

Should be fixed as of https://github.com/qgis/Quantum-GIS/pull/364.

Please reopen if necessary.
