QGIS Application - Bug report #6899
Drag and drop designer uses first field after project reload

2012-12-19 02:30 PM - Nathan Woodrow

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	GUI			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	16024	

Description

The new drag and drop designer ability in the Fields tab uses the first field for all fields defined in the designer when reloading project.

Hard to explain so here are the steps

1. Change to Drag and drop designer in Fields tab for layer
2. Add Tab group
3. Drag a few selected fields into the tab
4. Apply
5. Identify feature - All fields are mapped correctly
6. Save and reopen project
7. Identify feature - **All fields are mapped to the first field.**
8. Open Layer Properties - Hit Apply
9. Identify feature - All fields are mapped correctly

Field setup
setup.png

Correct result - from step 5

shouldn't we tag as "blockers" any new feature that isn't working as it should be? Cheers!

#2 - 2012-12-30 09:51 AM - Giovanni Manghi

- Priority changed from High to Normal

#3 - 2013-01-07 09:32 AM - Matthias Kuhn

Ouch, that one rendered this feature pretty useless.

Awaiting pull https://github.com/qgis/Quantum-GIS/pull/377

#4 - 2013-01-07 11:54 PM - Matthias Kuhn

- Status changed from Open to Closed

Fixed: commit:6b231a1
