

QGIS Application - Bug report #690

No query builder on postgis layers

2007-03-28 09:07 AM - Redmine Admin

Status: Closed	
Priority: Low	
Assignee: Tom Elwertowski	
Category: GUI	
Affected QGIS version:	Regression?: No
Operating System: All	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 10749

Description

If I add a postgis layer, I can build a query prior to adding the layer with no problems. If I view the properties of that layer and click the query builder button, I am not presented with a dialog to make changes to my query. Effectively I have to add a new layer with the proper query and delete the prior layer.

This occurred in a build from revision 6830 in trunk.
