QGIS Application - Feature request #6906
An option to avoid digitize repeated nodes and auto-intersections

2012-12-20 10:14 AM - Giovanni Manghi

Pull Request or Patch supplied:	No	**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	16031

Description

It would be very nice if:

  - when digitizing a line or a polygon a (not on purpose) double click would not create two exactly overlapping nodes

  - there was an option (inside snapping options) to allow the user choose to have QGIS refuse to allow do self intersections: ideally this option should produce an effect that works the opposite way as the snapping.
