Category:	Rasters			
Affected QGIS version:		**Regression?:**	No	
Operating System:	Windows	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed	
Crashes QGIS or corrupts data:		**Copied to github as #:**	10754	

Description

QGis v0.8 crashed when I try to open a [[LandSat]] img file of more than 190 000 kb. I have no problems with small files (less than 100000 kb)

History

#1 - 2007-12-30 06:33 PM - ersts -

I have tested img files of 108Mb without any problems. The user who posted this ticket was contacted on 2007-12-01 to see if the issue still remained in version 0.9.0 and if so, for a copy of the dataset that caused the offending crash. No response has been received as of yet.

#2 - 2008-03-19 03:54 AM - leolami -

No problems also with 0.9.2 vers.
Can you test it and close it if all is rigth?
Regards Leonardo

- *Resolution set to fixed*
- *Status changed from Open to Closed*

I close it. If you think it is still valid reopen it, please.
