

QGIS Application - Bug report #6967

Move failed layer load dialog to QgsMessageBar

2013-01-08 03:08 PM - Nathan Woodrow

Status:	Closed	
Priority:	Normal	
Assignee:	Nathan Woodrow	
Category:	GUI	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 16077
Description		
<p>When a user loads an invalid layer they are presented with a pretty unfriendly dialog popup</p> <p>dialog.png</p> <p>It would be good to remove this dialog and just show a message in the message bar above the canvas. The message bar is less intrusive and doesn't need to be dismissed just to continue working.</p>

Hello, bug triage...

this is a problem just for rasters (GDAL provider). For OGR provider, there is already a message bar...
