

## QGIS Application - Bug report #6997

### Locks kept on layers after removal from registry

2013-01-15 12:40 AM - Sandro Santilli

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Data Provider/PostGIS	
<b>Affected QGIS version:</b>	master	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> end of life
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 16101
<b>Description</b>		
<p>How it happened:</p> <ul style="list-style-type: none"><li>- Open DBManager, select a topology schema, select Topology Viewer</li><li>- Issue a SELECT DropTopology(&lt;topology_name&gt;) from an external monitor (psql)</li><li>- Verify that the command hangs, waiting on a lock</li><li>- Remove the whole topology viewer layer group from the registry</li></ul> <p>What happens:</p> <ul style="list-style-type: none"><li>- The DropTopology select is still waiting for the lock to be removed</li></ul> <p>Expected behavior:</p> <ul style="list-style-type: none"><li>- QGIS releases the lock when the layer is removed, and DropTopology command can complete</li></ul> <p>NOTE: I had to close QGIS in order for the command to complete.</p> <p>This happened with qgis as of head = commit:314d144</p>		

#### History

##### #1 - 2017-05-01 01:09 AM - Giovanni Manghi

- Easy fix? set to No
- Regression? set to No

##### #2 - 2019-03-09 04:04 PM - Giovanni Manghi

- Resolution set to end of life
- Status changed from Open to Closed

#### End of life notice: QGIS 2.18 LTR
