

QGIS Application - Bug report #7009

QGIS crashes when using merge selected feature / merge attributes tool

2013-01-18 07:52 AM - Alessandro Ciali

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Digitising	
Affected QGIS version:	master	Regression?: No
Operating System:	window	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 16109
Description 1.select at least 2 feature 2.select merge selected feature / merge attributes tool 3.in the window tool, choose the feature to take attribute from 4. QGIS crashes verified on current master, while tool worked without problems in 12d1a28 and 1.8 win7 64bit I hope it will be useful, waiting for feedback bye		

History

- Status changed from Open to Feedback

should be duplicated of #6902

as in my case I was not able to replicate the crash it would be useful to attach sample data.

#2 - 2013-01-18 08:15 AM - Alessandro Ciali

the probles seems to get bigger in time, because the nighly build version 12d1a28 didn't crash by simply transferring the attribute of one feature without min, max or other operation. I think this could be an upgrade of #6902

ok, sample data would be useful anyway.

- File sample_data.zip added

I send a sample data with 2 polygon: selecting merge tool and choosing the feature whose attributes will be transferred causes QGIS to crash.

#5 - 2013-03-08 08:44 AM - Alessandro Ciali

Tested the last master 969df01. I don't know what the solution was, but the problem seems to be resolved. By the way I will permorm further tests just to be sure. Fell free to clos the ticket.
