QGIS Application - Feature request #7057
DB Manager SQL window should remember query string when closing and re-use the string when re-opening SQL window

Easy fix?:	No	**Copied to github as #:**	16142

Description

Yesterday, I was working on a long SQL statement. I accidentally hit ESC on my keyboard, effectively erasing the statement.

As a way to prevent this mild "data lost", it would be nice for the DB Manager's SQL window to remember the query textbox string upon closing and re-display it upon re-opening (within the same application session).

duplicate of #4781

#2 - 2013-01-28 12:59 AM - Mathieu Pellerin - nIRV

Paolo, it's a duplicate as long as feature #4781 includes keeping history of SQL query string that are not executed yet.

I.e., in the above case scenario, the user - clumsy me - lost the SQL query he was building up by accidentally hitting ESC. If feature #4781 only covers keeping history of executed SQL queries, scenario wouldn't be handled.

Glad the issue is being looked at. Thanks.
