# QGIS Application - Bug report #7067

# Scale bar map association lost on save & close in composer

2013-01-29 02:18 AM - Stuart Ladd

Status: Closed Priority: Normal

Assignee: Category:

Affected QGIS version: 1.8.0Regression?:NoOperating System:Windows XPEasy fix?:No

Pull Request or Patch shapplied: Resolution: worksforme
Crashes QGIS or corrupts data: Copied to github as #: 16151

## Description

We have a map template with a print composer with 3 maps at different scales: In the scale bar drop down these are Map 0, Map 1, Map 2.

Maps 1 and 2 have scale bars on them.

When saving and closing, then reopening the project, the scale bar for Map 1 is associated with Map 2. You have to reset this every time. Because it's intended for a different scale it expands way off the edge of the screen.

#### History

## #1 - 2013-01-29 02:20 AM - Stuart Ladd

I should add that the Map 2 scale bar is also still associated to Map 2.

This may relate to resetting of scale bar parameters, mentioned in #4708

#### #2 - 2013-01-29 02:24 AM - Giovanni Manghi

- Operating System changed from Windows XP QGIS 1.8.0 to Windows XP
- Affected QGIS version changed from master to 1.8.0
- Status changed from Open to Feedback
- Category set to 33

Have you tested qgis master?

#### #3 - 2013-01-29 02:29 AM - Stuart Ladd

Not yet. Downloading nightly now (using OSGeo4W installer).

Sorry, using my work computers so, v slow. Will update in ~1 hour.

## #4 - 2013-01-29 02:55 AM - Stuart Ladd

- Status changed from Feedback to Closed

Apologies.

2024-04-25 1/2

Yes, loading the map in 1.9.0 correctly shows the scale bar (didn't even have to save it from 1.9 - loaded up the 1.8 file).

# #5 - 2013-01-29 02:58 AM - Giovanni Manghi

- Resolution set to worksforme
