

QGIS Application - Bug report #7089

Python console help window max size is too tiny

2013-02-02 06:20 AM - Borys Jurgiel

Status: Closed	
Priority: Normal	
Assignee: Salvatore Larosa	
Category: GUI	
Affected QGIS version: master	Regression?: No
Operating System: Debian	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: fixed
Crashes QGIS or corrupts data: No	Copied to github as #: 16171

Description

The python console help window seems to have a max size about 540x320. It just looks bad and is hardly readable. However, I don't see any size constraint in the ui file.

Observed in Master on KDE 4.8 @ Debian.

Hi,

the maxsize window constraint is because the help has little content and maximizing the window it was misleading.

Anyway, the console help will be migrated into new platform of qgis documentation [1].

I will do it asap.

Thanks!
