**Description**

Following #6921

With master I get a different bug.

Using either:

<http://wppgeog3:8082/geoserver/wfs?version=1.1.0>

or

<http://wppgeog3:8082/geoserver/wfs?version=1.3.0>

The following happens.

When I click connect I get this error:

"The WFS server does not support WFS version 1.0".

There are several problems here:

- The WFS server /does/ support all three versions of WFS (its GeoServer)
- There is no "WFS 1.0". There is a WFS 1.0.0, 1.1.0 and 1.3.0
- I've just requested WFS 1.1.0 or 1.3.0. Not 1.0.0

This doesn't happen if I use:

<http://wppgeog3:8082/geoserver/wfs?version=1.0.0>

I appreciate QGIS probably doesn't support them, but the error should be correct.
