

QGIS Application - Bug report #711
GRASS plugin compile error: GRASS_VERSION_MAJOR etc. no longer strings

2007-05-01 02:02 PM - Markus Neteler

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Build/Install	
Affected QGIS version:		Regression?: No
Operating System:	Debian	Easy fix?: No
Pull Request or Patch supplied:		Resolution: duplicate
Crashes QGIS or corrupts data:		Copied to github as #: 10770
Description		
<p>Currently QGIS no longer compiles with GRASS 6.3.CVS since the include/version.h was modified to:</p> <pre>bartok:grass63[296.2] cat include/version.h #define GRASS_VERSION_STRING "@(#) 6.3.cvs (2007)" #define GRASS_VERSION_MAJOR 6 #define GRASS_VERSION_MINOR 3 #define GRASS_VERSION_RELEASE cvs</pre> <p>Here the change from Glynn:</p> <p>http://freegis.org/cgi-bin/viewcvs.cgi/grass6/include/version.h.in.diff?r1=1.4&r2=1.5</p> <p>And a comment from Glynn:</p> <p>http://grass.itc.it/pipermail/grass-dev/2007-April/030658.html</p> <p>I'm afraid that this needs to be conditionalized. The QGIS code is in src/providers/grass/qgsgrass.cpp, lines 988 and following.</p> <p>Compare the related GDAL-GRASS plugin changes at</p> <p>http://trac.osgeo.org/gdal/ticket/1587</p> <p>Sorry for the mess, Markus</p>
