QGIS Application - Bug report #7121
Problem in displaying GRASS raster

2013-02-08 02:49 AM - Moreno Comelli

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	GRASS		
Affected QGIS version:	1.8.0	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	16192

Description

When calculating an interpolation from a text file dataset using the r.in.xyz GRASS module, the raster is correctly created, but not properly displayed in QGIS 1.8 (on Windows XP/7).

Clicking on it using the info tool, returned data don't match the drown object, and the shape changes depending on zoom.

In the image second_zoom.png, you can see the cells are not displayed as squares.

When using a higher zoom, an error message appear:

    5744736 bytes expected but 2284000 byte were read from qgis.d.rast

History

#1 - 2013-02-08 02:53 AM - Giovanni Manghi

- Status changed from Open to Feedback

please try qgis master, it should be fixed.

#2 - 2013-02-08 02:53 AM - Giovanni Manghi

- Affected QGIS version changed from master to 1.8.0

#3 - 2013-02-08 05:39 AM - Moreno Comelli

Same problems with QGIS 1.8 on Fedora 17.

#4 - 2013-02-13 05:05 AM - Moreno Comelli

With QGIS 1.9 it's ok.

#5 - 2013-02-13 11:53 AM - Giovanni Manghi

- Resolution set to fixed

- Status changed from Feedback to Closed

yes, it was fixed in qgis master.
