

QGIS Application - Bug report #7126

User needs to be able to cancel long render operation

2013-02-08 05:11 PM - Patrick Dunford

Status: Closed	
Priority: Normal	
Assignee:	
Category: Map Canvas	
Affected QGIS version: master	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: fixed/implemented
Crashes QGIS or corrupts data: No	Copied to github as #: 16195
Description	
<p>During a render that is taking a long time, the user has no opportunity to cancel the operation.</p> <p>There should be either a dialog box with a cancel button presented, or the keyboard should be scanned for presses of the Esc key.</p> <p>Otherwise there is only the option of force quitting the application and losing unsaved changes in the current project.</p> <p>1.9.0</p>	

History

#1 - 2013-02-09 01:22 AM - Giovanni Manghi

- Status changed from Open to Feedback
- Category set to Map Canvas

near the bottom right of the qgis window you have a "stop rendering" button, does this work for you?

#2 - 2014-06-21 01:40 PM - Giovanni Manghi

- Resolution set to fixed/implemented
- Status changed from Feedback to Closed

with multithreading this is no longer an issue.
