QGIS Application - Bug report #7127
Error when saving project with memory layers

2013-02-08 07:12 PM - Larry Shaffer

Status:	Closed			
Priority:	Severe/Regression			
Assignee:				
Category:	Data Provider			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	16196	

Description

When saving a project with memory layers the following dialog appears:

    'QgsVectorDataProvider' object has no attribute 'select'

This is since new vector api upgrade. I'm assuming this is just because the memory layer provider has not be upgraded yet.

History

#1 - 2013-02-09 01:03 AM - Giovanni Manghi

- Priority changed from Normal to Severe/Regression

#2 - 2013-02-09 12:34 PM - Larry Shaffer

- Status changed from Open to Closed

After some more testing, it is not QGIS, but the MemoryLayerSaver plugin. Moving issue to that tracker.
