Description

Hi,

my attempts to figure this out weren't successfull so far. Which GRASS version do you include in the QGIS for Windows version? Please post it there:

<http://qgis.org/uploadfiles/testbuilds/>
-> README

If other QGIS packages include GRASS, please post also there the version. This is relevant for us since people often report problems to us, too.

thanks,
Markus

Please note that significant progress has be made on winGRASS stability, especially with the vector attributes readong problems (happens in GRASS 6.3.CVS, we are getting out 6.3.0 asap).

Markus
