<b>Category:</b>	GRASS	
<b>Affected QGIS version:</b>	master	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>		<b>Resolution:</b> fixed
<b>Crashes QGIS or corrupts data:</b>		<b>Copied to github as #:</b> 16206
<b>Description</b>		
Open a GRASS mapset and load a bunch of non GRASS layers in QGIS.		
Then open a module like v.in.ogr.qgis or r.in.gdal.qgis		
you'll see that the "loaded layer" dropdown is no more updated on the fly when activating/deactivating layers in the TOC, it used to work.

- Resolution set to fixed
- Assignee set to Radim Blazek
- Status changed from Open to Closed

It was fixed in commit:923be58b1c.

All layers in the legend are now listed in the combo box, not only those switched on as before.
