

QGIS Application - Bug report #7205

Build pyramids - not building pyramids

2013-02-21 03:02 AM - Jonathan Moules

Status: Closed	
Priority: Normal	
Assignee:	
Category:	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 16246
Description	
<p>Using master - 5ed164a on Windows 7 32bit.</p> <p>- I have a TIF file which has no pyramids.</p> <p>- Using the SEXTANTE Toolbox > Build Pyramids, I accept the defaults (2 4 8 16) and press ok. The Window disappears instantly.</p> <p>There is no indication that anything has happened as a result of my action.</p> <p>The window just disappeared.</p> <p>There is nothing in any of the log message windows</p> <p>The metadata for the layer shows there are still no pyramids.</p> <p>The file remains unchanged (I have write permissions).</p>

That isn't supposed to be a strike-through. but a "- >" (without space)

#2 - 2013-02-21 03:09 AM - Giovanni Manghi

if is a sextante issue, please file it under sextante. Cheers!
