QGIS Application - Bug report #7205 Build pyramids - not building pyramids

2013-02-21 03:02 AM - Jonathan Moules

Status: Closed Priority: Normal

Assignee: Category:

Affected QGIS version:masterRegression?:NoOperating System:Easy fix?:No

Pull Request or Patch shapplied: Resolution:

Crashes QGIS or corruptes data: Copied to github as #: 16246

Description

Using master - 5ed164a on Windows 7 32bit.

- I have a TIF file which has no pyramids.
- Using the SEXTANTE Toolbox > Build Pyramids, I accept the defaults (2 4 8 16) and press ok.

The Window disappears instantly.

There is no indication that anything has happened as a result of my action.

The window just disappeared.

There is nothing in any of the log message windows

The metadata for the layer shows there are still no pyramids.

The file remains unchanged (I have write permissions).

That isn't supposed to be a strike-through. but a "->" (without space)

#2 - 2013-02-21 03:09 AM - Giovanni Manghi

if is a sextante issue, please file it under sextante. Cheers!
