

QGIS Application - Bug report #7206

Raster Calculator doesn't work with spaces in layer names

2013-02-21 03:18 AM - Jonathan Moules

Status: Closed	
Priority: Normal	
Assignee:	
Category:	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: duplicate
Crashes QGIS or corrupts data: No	Copied to github as #: 16247
Description	
<p>Using Master 5ed164a</p> <p>This seems like quite a bad one because it appears to work but actually doesn't give feedback that its not or why not.</p> <p>The following expression does "work" - it passes "expression valid" and the layer names are correct (I double-clicked them):</p> <pre>((IR SP1874@1 - RGB SP1874@1) / (IR SP1874@1 + RGB SP1874@1))</pre> <p>The problem is, the output result is "0" across the board.</p> <p>To actually get a proper NDVI result, I need to rename my layers and use this:</p> <pre>((IRSP1874@1 - RGBSP1874@1) / (IRSP1874@1 + RGBSP1874@1))</pre> <p>So its not working when layers have spaces in their names.</p>
