

QGIS Application - Bug report #7220

QGIS server error message when searching >1 word

2013-02-22 08:49 AM - Giovanni Manghi

Status:	Closed	
Priority:	High	
Assignee:		
Category:	QGIS Server	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 16254
Description		
<p>In the QGIS web client try set up a simple search, then try search for two words separated by a space. A message will pop up</p> <p><i>The filter string "nome" = 'penela penela' has been rejected because of security reasons. Note: Text strings have to be enclosed in single or double quotes. A space between each word / special character is mandatory. Allowed Keywords and special characters are AND,OR,IN,<,>=,>,>=,!=",',',(,),DMETAPHONE,SOUNDEX. Not allowed are semicolons in the filter expression.</i></p> <p>At first I supposed was a configuration problem or a client bug, then with firebug I realized that the message comes from the server. The URL with the request has the words between "" but it returns anyway the error. Not sure if is a regression, this has been observed on qgis master.</p>		

History

#1 - 2013-02-22 08:50 AM - Giovanni Manghi

- Subject changed from QGIS server error message to QGIS server error message when searching >1 word

#2 - 2013-03-18 02:48 AM - Marco Hugentobler

- Status changed from Open to Closed

Fixed in commit:bfde7c834a73280d05a9c7495a44c5563b7b70cd
