

QGIS Application - Bug report #7286

Assigning editForm for the layer doesn't work properly

2013-03-06 12:33 PM - Alexander S

| Affected QGIS version: master | Regression?: No |
| Operating System: Windows 7 | Easy fix?: No |
| Pull Request or Patch supplied: No | Resolution: |
| Crashes QGIS or corrupts data: No | Copied to github as #: 16295 |
| Description | |
| QGIS doesn't show my custom form after assigning it through <code>layer.setEditForm("form.ui")</code> . If I go to the layer's properties (Fields) and select Attribute editor layout = "Provide ui-file", I can see a correct path to my UI form. If I click OK now, to save settings and try to add a new feature, the form pops up as it used to be with version 1.8 | |

You need to also change the editor layout.

```
layer.setEditorLayout( QgsVectorLayer.UiFileLayout )  
layer.setEditForm("form.ui")
```
