

QGIS Application - Feature request #7288

Identify tool TopDown/Current directly in the Toolbar

2013-03-07 08:33 AM - Olivier Dalang

Status:	Open	Resolution: Copied to github as #: 16297
Priority:	Normal	
Assignee:		
Category:	Unknown	
Pull Request or Patch supplied:	Not supplied	
Easy fix?:	No	
Description		
<p>Hi !</p> <p>I quite often switch from "Top Down (stop at first)" to "Current" for the identify mode in the options, depending on if I'm working on a layer ("current") or if I explore a projected ("top-down").</p> <p>Those could actually both be made accessible directly from the toolbar, just like the select tools or feature actions.</p> <p>IMO it would be more consistent, since those are actually two tools where the most appropriate one depends on the situation rather than on the user's preference.</p> <p>Thanks !</p>
