

# QGIS Application - Feature request #7308

## Delete selected feature with Delete key

2013-03-10 05:58 AM - andskog -

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Digitising	
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> fixed/implemented
<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 16307
<b>Description</b>	
Being able to delete selected feature(s) in edit mode, by pressing the Delete key on the keyboard, would be a nice addition to the Delete Selected button in the edit toolbar.	

### History

you can set this from "Settings - Configure shortcuts" assigning the cancel button (or what you wants) to "delete feature".

- Status changed from Open to Feedback
- Category set to Digitising

#### #3 - 2013-03-21 10:56 AM - Antonio Locandro

Well that is an option, or it could be just added to the DEL key on the keyboard as default behavior like most GIS software works, this increases productivity plus is just one of those things that people tend to expect software do when you press DEL key.
